General Labor Job Description

- Attendance is very important, being here and on time every day.
- Observing all Safety rules and policies.
- Generally duties are what ever needs to be done to include but not limited to the following.
 - Take apart metal and wood forms using various hand/power tools.
 - Clean and prep forms for setup.
 - Make steel reinforcement cages for forms.
 - Setup forms so ready to place concrete into them.
 - Pour concrete into forms and finish with trowel.
 - Help with forming if needed (wood).
 - Help in yard with unloading, placement, or loading of product.
 - Cleanup, this is a big and very important part of the job.
 - There is some lifting involved; no one should lift beyond their capabilities, we have overhead cranes for heavy lifts.
- Equipment and supplies used includes:
 - Hand tools (Example: hammer, sockets, wrenches)
 - Power tools (Example: drills, grinder, saw)
 - Overhead crane (after proper training)
 - Grease and oil to lubricate forming.
